For the past 4 years, I have been working as a project manager for a project in the digital agency Wunderman Thompson and Massimo Filippi. During my work I was mainly focused on developing applications and web solutions. Past year I am focused on localization of master projects. I have been entrusted with the projects from the first client meeting, communication, development, testing to the final delivery for the client. During my work I have cooperated to create mailing campaigns, creation of graphic materials, books (electronic, physical), simple analytics, budgets, mentoring trainees and other activities that we can discuss in person. As part of my work, I have been able to collaborate with many interesting brands or projects such as Nestlé, Budweiser Budvar, Kofola (Semtex energy), Medard Online, ONEMANSHOW, GSK and others. I am currently employed but looking for a new opportunities as a project manager in a similar industry. I am open to internal or external cooperation.

Massimo Filippi s.r.o
