Skills

Project management
Time management
Mentoring
Team Leadership

For the past 6+ years, I have been working as a project manager and senior delivery manager for a project in the digital agency Merkle technologies, Wunderman Thompson and the others. During my work I was mainly focused on developing applications and web solutions. I have been entrusted with the projects from the first client meeting, communication, development, testing to the final delivery for the client. During my work I have cooperated to create mailing campaigns, creation of graphic materials, books (electronic, physical), simple analytics, budgets, mentoring trainees and other activities that we can discuss in person. As part of my work, I have been able to collaborate with many interesting clients such as GSK, Pfizer, PMI, Nestlé, Vodafone Qatar, Budweiser Budvar, Kofola (Semtex energy), Medard Online, ONEMANSHOW foundation and others. I am currently available and looking for a job as a project manager in a similar industry.
